# Mix and Match

Mix and Match is a pricing structure introduced to save you money on bulk buys. Buy any items from the same group, and the total quantity ordered will unlock better prices. For example, if the best price is for 48 items, you'll get that price if you buy 48 items from one group, even if they're different products.

Just look for the mix and match eligibility below within this catalogue and items of the same colour group combine to unlock better pricing.

For example if you see the below under any product:

**'This product is eligible for mix and match'**

Any product sharing this same colour text are within the same mix and match group, different colour text indicates different groups and pricing structures. Items from different groups won't combine for discounts.
